

## Partners in innovating the future of Veterans' healthcare

InnoVet Health is a newly formed Veteran Owned Small Business (VOSB) bringing together seasoned healthcare IT specialists that are truly and deeply ambitious about modernizing VA healthcare IT.

By prioritizing our focus on health process transformation, interoperability, data analytics and systems integration, we seek to catalyze EHR modernization and push the boundaries of innovation at VA.

## Core Competencies

We drive value for our clients based on our principals' broad and deep experience with VistA, health informatics and interoperability at VA, and with EHR deployments at world renowned healthcare institutions. We bring seasoned professionals with an in-depth knowledge of VA systems, processes and culture, as well as clinical, business & administrative operations know how.

### Pilots, Proof-of-Concepts and MVPs

Web and mobile rapid application design and prototyping, human-centered design, FHIR-based mobile apps, Minimal Viable Product (MVP) development and Small Business Innovation Research (SBIR) and Innovation grants proposal writing, research & development.

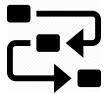

### Interoperability

eHealth Exchange, Direct Messaging, State and Regional HIE Networks Network Alliances (CommonWell, CareQuality, Direct Trust), Health IT and Telemedicine Standards (IHE profiles, NwHIN, CCDA, FHIR, HL7, Continua Alliance), and Terminologies (SNOMED CT, LOINC, RxNorm, CPT, and ICD).

## Health Informatics and Data Analytics

Clinical decision-support systems, Predictive Analytics & Machine learning (open source software, R, IBM Watson, AWS AI and Google Analytics), Structured & unstructured data, Clinical Data warehouse, Business Intelligence dashboard and modeling KPIs for population health management.

## Process Transformation

EHR process modernization, Clinical workflow modeling, Care coordination, ADT Notifications, Referral Management, Consumer Health (Patient Health Portals, Blue Button), and Telemedicine.

## Systems Development, Integration & Testing

EHR/EMR integration, deployment and testing. Federal Health Architecture, SOA 2.0, Restful Microservices, Smart on FHIR apps, Cloud SaaS deployment (FedRamp certified cloud, AWS, Azure), Modern Web frameworks (Java, NodeJS, AngularJS, Redis), knowledge and policy engineering (business rules, consent management, policy decision engine), and ATO processes.

## Health Data Management

Health data domains standardization (allergies, meds, problems, immunizations, and others), Health data architecture, mapping and modeling (CCDA, FHIR, MDHT), Relational and no-SQL database management (e.g. Hadoop), and Knowledge-based Systems.

## Strategic Planning and Program Management

Multi-year strategic roadmap and planning, Full Project lifecycle management (Agile and Lean Six Sigma), Business requirements management, Financial management & planning (budgeting, earned-value, cost-benefit analysis), change management process, and end user training & adoption.

# VA Past Performance

Our principals have worked as contractors with Department of Veterans Affairs (VA) and VA/DoD Interagency Program Office (IPO) delivering strategic planning, Interoperability consulting, analytics, requirements management, development and testing support and program and project management. Our principals have also led deployment of electronic health record (Epic, Cerner, HELP, VistA, MTRACK) at various large private and government healthcare agencies, decision support for both providers and consumers, and analytics platforms.

## Differentiators

We differentiate ourselves by producing solutions that work the first time and then scaling up iteratively. We listen first to understand customer's needs. Our decisions are data-driven, results-oriented, and user-focused. We are not content with the status quo. We hire the top and passionate talent in healthcare IT. We inspire collaborative action.
